

To: Our Valued Customers

Re: An update for our customers regarding Coronavirus (COVID-19)

Date: 3/21/20

We are Open!

During this unprecedented time, as the country works to stop the spread of COVID-19, Wayne Electric Company is still working and serving our cherished community.

We have been following the recommendations of the federal, state, and local governments concerning this pandemic. Our organization is meeting regularly and implementing best practice procedures to mitigate risk to our employees, our customers, and our community. We have new cleaning procedures in place at our main office, each job site, and all of our trucks. Anyone who has two of the three COVID-19 symptoms is to remain at home.

In addition to hygiene procedures, we are making a special effort to: communicate, be efficient, and work steady through this crisis. With over 65 years of Service, Wayne Electric has continued to provide support through wars, storms, economic downturns, and now pandemics.

Faith not fear, strength not weakness, calm in the midst...

God Speed,

Jason Thomas Pate III
